

Demo编译说明

Windows平台

方法一

1. 使用VS2019/VS2022打开cpp路径下的 `NetSDKDemo.sln` 即可编译运行

方法二

1. 打开cmd，进入cpp路径下
2. 运行如下命令编译

```
1 cmake -B build
2 cmake --build build --config Release --target ALL_BUILD
```

3. 运行demo

```
1 ./build/Release/NetSDKDemo.exe
```

Linux平台

1. 打开终端，进入cpp路径下
2. 编译相关工具安装

```
1 sudo apt-get update -qq && sudo apt-get -y install \
2     autoconf \
3     automake \
4     build-essential \
5     cmake \
6     git-core \
7     libx11-dev \
8     libxext-dev \
9     meson \
10    ninja-build \
11    pkg-config \
12    wget \
13    yasm \
14    zlib1g-dev
```

3. 运行如下命令编译

```
1 cmake -B build
2 cmake --build build
```

4. 运行demo

```
1 ./build/NetSDKDemo
```
